

Sebastián Hernando

Solutions Architect & Full-Stack Developer

Buenos Aires, Argentina (Remote) | sebastianhernando.dev@gmail.com | (54) 11-2347-0448 | [Portfolio](#) · [LinkedIn](#)

PROFESSIONAL SUMMARY

AWS-focused solutions architect and full-stack developer, 3 years' experience building FinOps and data-driven products for financial-services, insurance and healthcare clients. Core developer of ZenCost (AWS Marketplace), owning cross-account architecture (least-privilege IAM, CloudFormation StackSets), multi-cloud cost-data pipelines (AWS, Snowflake, Databricks) and React/Next.js dashboards. AWS Certified Security – Specialty.

PROFESSIONAL EXPERIENCE

IVCISA / Alpha-IB — Solutions Architect & Full-Stack Developer Jun 2025 – Present

ZenCost — FinOps SaaS on AWS Marketplace (Essentials / Growth / Enterprise tiers), used by banking, insurance and healthcare organizations in LatAm. One of three core developers, owning features end to end.

- Re-architected cost reporting from the Cost Explorer SDK to an **AWS Cost & Usage Report (CUR) pipeline**: CloudFormation provisions a Parquet Data Export, S3 and least-privilege IAM role per client account; S3 events feed a primary + fallback SQS queue consumed by a pandas CRON loader into PostgreSQL, reconciled against Cost Explorer to the cent.
- Cut a user-activity cost-attribution report (CloudTrail × CUR) from **5+ hours to under 5 minutes** by moving heavy joins into DB stored procedures and switching the frontend to job polling, eliminating EC2 memory exhaustion.
- Extended the platform beyond AWS to **Snowflake and Databricks** (key-pair/Secrets Manager auth and CFO/CTO PDF reports; Databricks OAuth M2M multi-workspace onboarding), with a cloud-aware account model and routing.
- Built **agentless multi-account onboarding** via CloudFormation StackSets — deploying across an entire AWS Organization in minutes with nothing installed in client instances, meeting enterprise security requirements without friction.
- Implemented **multi-tenant access control and security**: per-organization module toggling, controller-level authorization, resource-level permissions with audit logging, TOTP-based MFA end to end, single-active-session enforcement and admin IP allow-listing.
- Owned much of the **front-end UX/UI** (real-time dashboards, searchable data tables, guided onboarding, CEM CFS/SFS assessment interface) and led a production-environment migration (Cognito, RDS, AssumeRole). Also contributed to Atlas Core, a GenAI/RAG product.

Bigger (Software Agency) — Full-Stack Developer (Remote) Jul 2023 – Jun 2025

- **Poulz** (Sep 2023 – Oct 2024) — Built the MVP of an interactive live-streaming platform (live video, chat, moderation) with **Stripe Connect payments** on AWS IVS; sustained a perfect 5.0 customer-satisfaction score across all sprints.
- **CricConnect** (Oct – Dec 2024) — Built a location-segmented sponsorship & advertising system that **became a live revenue stream for the client**. Stack: PHP/Laravel, React, AWS (Lambda, API Gateway, DynamoDB).
- **InformAG** (May – Jun 2025, ~2 weeks) — Picked up **.NET 8 / Azure Functions** to ship real-time ingestion of agricultural sensor data into Avro storage with data-integrity alerts — ramping up quickly in an unfamiliar stack.

TECHNICAL SKILLS

Cloud & FinOps: AWS (IAM, CloudFormation / StackSets, Cost & Usage Reports, CloudTrail, Cognito, EKS, Lambda, SQS, EC2, SES, S3, etc), Snowflake, Databricks, AWS Well-Architected

Languages & Backend: TypeScript, Python (boto3), C# / .NET 8, SQL; Node.js, NestJS, FastAPI, REST APIs, WebSockets, Stripe Connect

Frontend: React, Next.js, Vue.js, Tailwind CSS, complex state management (Zustand), real-time dashboards

Data & DevOps: PostgreSQL, MySQL, MongoDB, pandas, Parquet / Avro; Docker, CI/CD, Cypress, Playwright, Jest

CERTIFICATIONS, EDUCATION & LANGUAGES

Certifications: [AWS Certified Security – Specialty](#) · [AWS Certified Cloud Practitioner](#) · AWS Solutions Architect – Associate (*in progress, Aug 2026*)

Education: University Technical Degree in Software Programming — Universidad Nacional de Quilmes (UNQ), Argentina (2023 – Present)

Languages: Spanish (Native) · English (Intermediate B1, advancing to B2; certified by UBA)
